.OFFICE

What inspiration can interior design trends from other sectors offer for shaping contemporary office spaces? Hotels, restaurants, educational institutions and even residential spaces serve as creative reference points. At the heart of this exploration: lighting in the boutique office.

.FOR ALL THE SENSES

How do our senses shape interior architecture – beyond the visual? md explores what it means for interior design when users live with deafness or autism. This issue also presents best practices that integrate sensory needs into the spatial layout from the start – taking into account which senses are most engaged in which areas.

.ACOUSTICS

Acoustic elements can appeal not only to the ear but also to the eye – as this feature demonstrates. md also challenges the conventional notion of acoustics and asks: What if design didn't aim for silence, but embraced sound? The emerging trend of listening bars provides a compelling basis for reflection.
