## BUILDING FOR CHILDREN – PROJECTS

How can architecture be designed to support children in learning and playing? We showcase a selection of projects spanning nurseries, schools and leisure spaces for children and young people, including a children's farm in Berlin, the Jenaplan School in Weimar, a kindergarten in Vorarlberg and the Children's Art Lab in St Pölten.

## BUILDING WITHIN EXISTING CONTEXTS – EAST MODERNISM

Architecture in the GDR extended far beyond prefabricated slab construction. How can it be further developed in architectural and energy-related terms? From careful restoration to radical transformation, we present a range of approaches, alongside a look at historical construction sites and the scaffolding and cranes of earlier centuries.

### **BUILDING FOR CHILDREN – PRODUCT SOLUTIONS**

This section highlights product solutions for nurseries and schools that foster learning and play. Key themes include durable, non-toxic materials, modular systems, acoustic performance and well-considered colour and lighting concepts that provide orientation and create a welcoming environment.

### **TRENDS: SPORTS FACILITIES**

Within the context of "Building for children", movement and physical activity play a key role alongside educational and care facilities. Swimming pools and sports halls come with specific requirements, particularly when it comes to refurbishment.

### **INTERIOR FIT-OUT – PRODUCT SOLUTIONS**

Sustainable solutions for interior fit-out take centre stage in this section. The focus is on acoustically optimised ceiling and wall assemblies, doors and partition systems, fire protection measures and surface finishes.
