Impactful materials

Publication date: July 2027

Cooperation of db deutsche bauzeitung and
md INTERIOR DESIGN ARCHITECTURE

Now in its sixth edition, the special issue brings architecture and interior design together. The editorial teams of md and db join forces to shed light on the interplay between interior and exterior spaces. Materiality is approached holistically – extending beyond tactile quality, construction, colour and atmosphere. The selected projects focus on sustainability, building in existing contexts and the use of innovative materials. The issue features a dual cover.

Building ahead

Publication date: September 2027

Working with existing buildings has always been a core discipline of interior architecture. But expectations are rising: in an age of resource scarcity, the question is no longer simply how buildings can be carried forward into the future, but how they can be designed for further cycles of use from the outset. From reversible solutions and circular material flows to innovative materials, this special issue explores answers to one of the defining questions of contemporary architecture.

SPECIAL ISSUES 2027

arcguide db md

NEW

PROJECTS that blew us away

arcguide

Publication date: December 2027

Your reference – powerfully staged in an architectural context. This editorially curated special issue presents your project together with the architectural firm involved – featured across a visually striking double-page spread with interviews, background insights and a project fact box. Also available as an e-paper edition to maximise digital reach.

» see page 37

md Special “In conversation”

Publication date: October 2027

What is more valuable in times like these than genuine conversation? In this special issue, people from design practice and industry have their say, looking ahead, developing visions and addressing the questions of the future: How can we achieve more with fewer resources? How can the profession embrace greater responsibility? And what distinguishes humans from machines?

» further details

THE MAGAZINE

db delivers independent specialist journalism where architecture, technology and building culture meet. Its editorial team examines projects, materials and technologies and places current developments in a critical, well-researched context. The focus is on quality, future viability and resource efficiency – from design, construction, energy and economic perspectives.

CONTENT

db showcases outstanding projects – from innovative housing to complex infrastructure. Particular attention is given to sustainable, energy-efficient and resource-conscious solutions for the transformation of the building sector and for working with existing buildings. Every project is reviewed on site by db's specialist authors.

TARGET GROUP

Architectural/civil engineering firms, planning departments of industrial companies, banks, insurance companies, municipal building departments, building and housing associations, construction companies, engineering firms specialising in structural engineering/structural design.

CONCEPT & SECTIONS

FEATURES

Topic-specific product communication helps companies reach planners directly – with practical, solution-focused content that is relevant to their daily work.

BUILDING IN EXISTING CONTEXTS

Renovation, conversion and vertical extension are key to the building transition. Companies showcase innovative ways to help transform the existing building stock.

INSIGHTS FROM PRACTICE

Key perspectives, industry opinions and interviews.

TRENDS/RECOMMENDATIONS

'Products in Practice' and 'Tech News' highlight innovative projects and eco-friendly building methods.

MAGAZINE PROFILE

01 Title:	db deutsche bauzeitung
02 In brief:	Under the motto “architectural perspectives”, db deutsche bauzeitung – Germany’s oldest and most renowned architectural magazine – focuses on in-depth architectural critique, building culture and technological developments. db critically filters and analyses relevant building events and provides solid background insights. With clear statements and in-depth analyses, db actively fosters the architectural discourse. Features highlight projects from Germany and abroad in terms of urban planning, architectural, structural, technical, energy-related and economic perspectives and are expanded with expert articles. Topics on building in existing contexts in every issue (conversion, energy-efficient refurbishment and monument preservation). The construction turnaround and climate-friendly building are regularly the focus of the db editorial team.
03 Target group:	Architectural/civil engineering firms, planning departments of industrial companies, banks, insurance companies, municipal building departments, building and housing associations, construction companies, engineering firms specialising in structural engineering/ structural design

EDITORIAL SCHEDULE 2027

Issue	01-02/2027	03/2027	04/2027	05/2027	06/2027
PD	04.01.2027	02.03.2027	02.04.2027	03.05.2027	02.06.2027
AD/MD	03.12.2026	03.02.2027	04.03.2027	06.04.2027	30.04.2027
Themes	Building differently With our trade fair issue for BAU 2027, we continue db's long-running "Building differently" series. Circular and resource-efficient construction, Building Type E, simple and robust building methods, built examples of experimental architecture and sufficiency in architecture. Building in existing contexts – latest developments Energy-efficient refurbishment, making the most of limited resources, case studies Trends BIM and AI	Culture Cultural centres are places for meeting, learning and exchange. Whether designed as multifunctional spaces or as museums, theatres or concert halls, they play an essential role in a thriving society. Building in existing contexts: Renewing churches The conversion and adaptation of churches remains a perennial issue in architecture – even in times of a weaker economy. Trends Lighting	Sports facilities Current developments in the planning and design of sports venues, sports halls and swimming pools, with a focus on sustainable, durable materials. Refurbishments and new buildings featuring timber, steel or hybrid structures. 20 years of Metamorphose – pioneers in covering refurbishment, conversion and heritage conservation. Trends Outdoor spaces	Infrastructure projects Buildings for urban utilities, waste management and infrastructure are often overlooked from a design perspective, yet they have a major impact on the built environment. Planning and design of municipal depots, maintenance facilities, data centres, heating plants, water towers and recycling centres. Building in existing contexts – latest developments The challenges of vertical extensions and urban densification, fire protection in existing buildings, case studies Trends Fire protection	Multigenerational living How can homes be intelligently planned or adapted to accommodate several generations under one roof? How can existing homes be converted to provide dignified, age-appropriate living? Intelligent solutions for vertical extensions and additions, as well as flexible floor-plan typologies. Building in existing contexts: 100 years of the Weissenhof Estate The legendary housing experiment celebrates its centenary and is undergoing extensive refurbishment for IBA 2027. Trends Healthcare buildings
Key product themes	Trade fair BAU	Interior and exterior surfaces, colour, render, lighting, acoustics, lighting systems, glass, bathroom and sanitary design	Roofing, outdoor spaces, parking systems, drainage, flooring, modular construction, software	Insulation, masonry, concrete, fire protection, structural water-proofing, interior fit-out	Balconies and loggias, accessibility, access, solar shading, HVAC, software

EDITORIAL SCHEDULE 2027

Issue	07-08/2027	09/2027	10/2027	11/2027	12/2027
PD	06.07.2027	03.09.2027	01.10.2027	02.11.2027	03.12.2027
AD/MD	08.06.2027	09.08.2027	06.09.2027	05.10.2027	08.11.2027
Theme	Impactful materials The focus is on the interface between architecture and interior design – materiality is approached holistically, including such aspects as tactile quality, construction, colour and spatial impact. Key topics include: • Sustainability • Building in existing contexts • Innovative materials These topics are illustrated through selected projects – each with a focus on both interior and exterior spaces. The tactile qualities of different switches are also examined in relation to specific materials.	City life How is the city centre being redefined as retail and office uses decline? What does this transformation mean for the people who live there? How can vacant spaces be put to meaningful new use and urban centres revitalised? Key topics include the 15-minute city, climate-resilient urban planning, smart cities and the densification of existing urban areas. Building in existing contexts: Late 19th-century buildings Few periods have left behind such a large building stock – making suitable refurbishment solutions particularly important. Trends Climate resilience	Denmark Danish architecture is widely regarded as a pioneer in sustainability, circularity and liveable urban planning, combining high aesthetic standards with bold ideas. Current projects and innovative approaches in cities such as Copenhagen and Aarhus, by the water and in rural areas. Building in existing contexts – latest developments Building materials for sustainable refurbishment, circular construction, case studies Trends Circular construction	The art of structural engineering Successful design is shaped to a significant degree by the contribution of structural engineers and by close collaboration between architects and engineers. The latest technical developments and possibilities in structural engineering, including bridges and transport structures, halls and towers. Building in existing contexts – latest developments The challenge of adaptive reuse, the latest developments in building law and standardization, case studies Trends Steel and timber construction	Monolithic construction Monolithic and solid construction using concrete, natural stone, timber or brick stands for durability and robustness. Regional differences and the adaptation of these construction methods to different climatic conditions. Simple and robust construction in the spirit of Building Type E and sufficiency. Building in existing contexts: low budget How existing buildings can be refurbished or converted cost-effectively in times of tight budgets. Trends Modular construction
Key product themes	Interior and exterior surfaces, colour, render, timber, metal, concrete, ceramics, glass	Outdoor spaces, drainage, windows, switches, building automation, bathroom/sanitary	Doors and gates, interior doors, locking systems, fittings, security technology, façades	Roofing, photovoltaic systems, solar technology, timber-, steel- and modular construction, software	Masonry, concrete, clay, renovation, office, fire protection, HVAC

THE MAGAZINE

Interior design with attitude: md combines aesthetics, ambition and analysis. With editorial depth, carefully curated products and a keen eye for trends, md is an influential voice in the industry – independent, opinionated and close to professional practice. Across print, streaming and social media, md delivers inspiration, sound expertise and fresh perspectives for everyone who plans and shapes spaces.

CONTENT

md explores how interior design is shaping our future – through trailblazing projects, visionary thinking and hands-on expertise. New materials, smart products and inspiring design concepts are not just showcased, but thoughtfully curated and contextualised. Be it AI and digitalisation, circular design or new ways of working: md provides orientation, practical strategies and ideas for everyone working to make interior design fit for the future.

TARGET GROUP

Interior architects and planners, office planners and interior designers as well as the upmarket specialised trade.

6 ISSUES

plus 2 special issues:
'Material wirkt' and
'Weiter bauen'
(7,200 copies)

CIRCULATION

NEWSLETTER

16,000 subscribers

With three themed sections per issue, *md* moves between specialist planning topics and widely applicable design solutions. This framework offers manufacturers the opportunity to present themselves as practical, solution-driven partners.

md highlights forward-looking developments in interior design – with a focus on materials, products and design-driven solutions. Planners receive well-founded inspiration for sustainable design.

Where others skim the surface, md goes deeper. Industry specialists report on production processes, application possibilities and real-world experience. This is where expertise takes the floor. md is essential reading for interior designers and planners.

MAGAZINE PROFILE

01 Title: md INTERIOR DESIGN ARCHITECTURE

02 In brief: md is the independent platform for high-quality interior design and sophisticated object furnishing. Clearly structured and with a sophisticated outfit.

md publishes serious journalistic articles in every issue, individually researched and exclusively written. Practical and at the same time looking beyond the horizon, with interfaces to interior design, architecture and design.

In each issue, md dedicates a thematic block to three different specialist disciplines and planning modules. Selective, forward-looking and discerning.

03 Target group: Anyone involved in planning and furnishing interiors: interior designers, architects, designers, interior fitters, premium retailers, office fitters and office planners.

EDITORIAL SCHEDULE 2027

Issue	01-02/2027	03-04/2027	05-06/2027	Special issue
PD	10.02.2027	01.04.2027	03.06.2027	06.07.2027
AD/MD	13.01.2027	02.03.2027	30.04.2027	08.06.2027
Theme	Office From meeting rooms and informal spaces to the canteen: one of the key challenges in office design is creating a sense of belonging among employees. Which spatial solutions can help achieve this? Education Educational spaces are becoming increasingly open. From daycare centres and universities to museums, planners are responding to the latest pedagogical insights with lighting concepts and the integration of media. Lighting Light has a powerful impact on how spaces are experienced. It can enhance concentration in the workplace, encourage purchasing in retail environments and create intimacy in restaurants. Colours, materials and architecture only come fully to life with the right lighting concept. The challenge is finding the right light for every purpose.	Sanitary design Sleep trackers, meditation apps and nutritional supplements – longevity is booming. The key space for rest, regeneration and wellbeing is the bathroom. What solutions should interior designers know about to inspire health-conscious, lifestyle-driven clients – particularly in the hotel sector? Living Living spaces are becoming softer. Deep furniture and flexible zones set the tone, while carefully coordinated lighting, walls and flooring complete the overall look. Kitchen As kitchens become ever more integrated into the living space, their visual and material qualities take centre stage. At the same time, extractor hoods, fittings and appliances are also surprising users with new functions.	Office Companies are bringing employees back on site – and that calls for smart planning. How can existing properties be transformed into modern workplaces efficiently and cost-effectively, ideally without the need for a building permit? Flooring Visually and tactilely appealing, robust and healthy for indoor living – these are qualities many clients now expect from flooring. At the same time, the industry is embracing circularity. What can other sectors learn from the recycling concepts already being developed in flooring? Modular construction Thinking in modules can cut costs and shorten construction times. How can these principles be applied to interior design – for example through room-in-room solutions? And isn't the ability to create highly individual spaces one of interior design's greatest strengths?	Impactful materials The focus lies at the intersection of architecture and interior design – materiality is approached holistically, including such aspects as tactile quality, construction, colour and spatial impact. Key topics include: • Sustainability • Building in existing contexts • Innovative materials These topics are illustrated through selected projects – each with a focus on both interior and exterior spaces. In addition, in-depth product features highlight surfaces and materials that contribute to holistic project solutions. The tactile qualities of different switches are also examined in relation to specific material.

Theme	Glass Mirrored, dichroic or satin-finished: glass is a versatile material with both decorative and functional applications – from lighting to large-scale spatial design. Sustainability Churches are no longer just sacred spaces. As congregations shrink, the conversion of former places of worship and community buildings is becoming increasingly relevant. Digitalisation Which AI tools are available, and how can they support interior architects? How do you write effective prompts, and which programmes can assist with the design process today – with or without AI? A practical guide.	Building ahead Working with existing buildings has always been a core discipline of interior architecture. But expectations are rising: in an age of resource scarcity, the question is no longer simply how buildings can be carried forward into the future, but how they can be designed for further cycles of use from the outset. From reversible solutions and circular material flows to innovative materials, this special issue explores answers to one of the defining questions of contemporary architecture.	Office Whether lobby, corridor or meeting staircase, circulation spaces are moving back into the heart of design. Designers use intelligent acoustics, furniture solutions and visual zoning across ceilings, walls and floors to define these spaces. Acoustics Although many employees value interaction with colleagues, noise-cancelling headphones isolate them from the office community. Which spatial solutions – from acoustic baffles to meeting pods – can help counteract this? Hotel Short-stay apartment chains promise flexibility and privacy, while shared spaces such as hotel bars and personal interaction between staff and guests are becoming less central. What does this shift mean for hotel design, and how can traditional hospitality continue to hold its ground?	Society From new forms of housing to education and travel, interior architects are increasingly called on to create environments that enable older people to participate fully in everyday life. The spectrum ranges from accessible adaptations to high-end senior living. Hidden features From multifunctional kitchen taps and intelligent lighting controls to subtle material innovations, sophisticated fittings and almost invisible acoustic solutions in restaurants: more and more components are taking on additional functions that are barely noticeable. A quick guide. Shipbuilding From private yachts to cruise ships, the maritime sector opens up new opportunities for interior architects. But what changes when interiors are designed for the water rather than for land?

FROM INSPIRATION TO DECISION. YOUR BRAND RIGHT AT THE HEART OF IT.

Reach architects, interior designers, planners and designers at the key stages of their information and product search – on our websites, in our newsletters or with an exclusive newsletter.
